NNLM All of Us Community Engagement Network

Why Library Partners are Critical to the All of Us Research Program

April Wright NNLM *All of Us* Community Engagement Coordinator December 2018

U.S. National Library of Medicine

Precision medicine is an emerging approach for disease treatment and prevention that takes into account individual variability in lifestyle, environment, and biological makeup.

It is a radical shift in how each of us can receive the best care possible based on our unique characteristics.

We have technologies that can collect and crunch huge amounts of data.

More people are engaged in their health, and can track and share their data — like steps and sleep.

We have a greater understanding of human genes.

The time is right.

Precision Medicine in Real Life

Right treatment for the right person

All of Us Research Program: Mission and Objectives

Nurture relationships

with one million or more participants, from all walks of life, for decades

To accelerate health research and medical breakthroughs, enabling individualized prevention, treatment, and care for all of us

Catalyze a robust ecosystem of researchers and funders hungry to use and support it

Our mission

Deliver the largest, richest biomedical data set ever that is easy, safe, and free to access

Diversity

Reflecting the country's rich diversity to produce meaningful health outcomes for communities historically underrepresented in biomedical research.

All of Us Core Values

- Participation in the All of Us Research
 Program will be open to interested
 individuals
- The program will reflect the rich diversity of America
- Participants will be partners in the program
- Trust will be earned through robust
 engagement and full transparency
- Participants will have access to information and data about themselves

Data from the program will be broadly accessible to empower research

- The program will adhere to the PMI
 Privacy and Trust Principles and the PMI Data Security Policy Principles and Framework
- The program will be a catalyst for innovative research programs and policies

Goals: Partnership between All of Us and NNLM

- To increase the capacity of public library staff to improve health literacy.
- To equip public libraries with information about the All of Us Research Program to share with their local communities.
- To highlight public libraries as a technology resource that participants can use to engage with the program, particularly those in underserved communities affected by the digital divide.
- To establish the All of Us Training & Education Center, an online platform about All of Us and precision medicine, with resources for members of the public, health professionals, librarians and researchers.

Engagement activities

Potential engagement activities

- Speaker programs Book clubs: NHOs, genetics, Graphic Medicine
- Health Information kiosks & games
- Partnering with other community groups

- Multilingual programming
- Highlighting tools and resources for disabled populations
- Hosting health fairs
- Exhibiting •
- Leveraging makerspaces and digital commons

And more...

Matchmaking: Public Libraries and Academic Libraries

atlanta-fulton public library system Take your dreams off the shelf.™

DURHAM COUNTY

Discussion

- How many of you offer health-related programming at your library?
- What kinds of programs do you offer?
- What types of programs are easy for you to use and host?

What kinds of partnerships do you have with local hospitals or medical schools to offer programs?

> BECAUSE LIBRARIES ARE PARTNERS IN A HEALTHY COMMUNITY.
